

LILLY MANAGEMENT GROUP
knowledge. strategy. vision.

OUR METHODS — 4 SIMPLE STEPS

Depending on your needs, LMG offers a range of custom consulting solutions and proprietary programs designed to meet specific industry needs.

Our practice is simple and straightforward:

1. We interview prospective clients at no charge to accurately determine their issues or needs. Preliminary interviews are confidential, regardless of the outcome.
2. We develop and submit a documented “no surprises” proposal which outlines:
 - Our understanding of the purpose and scope of the project
 - Project objectives
 - Measures of success
 - Value to the client
 - Methods or options for execution
 - Timing and delivery
 - Accountabilities
 - Terms and conditions
3. During the course of a project, we welcome an interactive relationship with our clients while also ensuring minimal disruptions in their work schedules.
4. Projects are delivered on time and presented in-person, using both electronic media and written reports that include recommendations and strategies. These meetings are also intended to discuss findings and to address client questions.
